

**B**

Panel B shows a large grid of 100 small squares, each containing a single character from the alphabet. The characters are arranged in a 10x10 grid. The first column contains the letters A through J. The second column contains the letters K through T. The third column contains the letters U through V. The fourth column contains the letters W through X. The fifth column contains the letters Y through Z. The remaining five columns contain the letters A through Z in a repeating pattern.
